

FAIQA RASHID

Faisalabad, Pakistan | 0325-0062083 | faiqarashid06@gmail.com

PROFESSIONAL SUMMARY

Computer Science student specializing in Full-Stack Web Development and Machine Learning, with hands-on experience building production-quality applications. Proficient in end-to-end development using Python, JavaScript, PHP, and SQL. Demonstrated ability to integrate AI/ML solutions into scalable web applications. Active participant in competitive hackathons (IBM Developer Day, AMD Developer Hackathon) and passionate about clean code, user-centric design, and continuous learning. Seeking internship opportunities to contribute technical expertise in full-stack development and AI-driven solutions.

TECHNICAL SKILLS

- **Programming & Databases:** Python, C++, Java, SQL (MySQL).
- **Web Engineering:** PHP, HTML5, CSS3, Streamlit (Data-driven Web Apps).
- **AI & Data Science:** Machine Learning (Scikit-Learn), Basic Data Analysis, Prompt Engineering.
- **Systems & Networking:** Cisco Packet Tracer (Network Topology), Logisim (Logic Circuit Design).
- **Development Tools:** VS Code, Jupyter Notebook, Git / GitHub, Canva.
- **Professional Competencies:** Advanced Debugging, Problem Solving, Technical Documentation (SDLC), Efficient Time Management.

PROJECTS

Pakfreelance - Freelance Marketplace Platform | Python, JavaScript, MySQL, Full Stack

AMD Developer Hackathon Participant | Live Demo: [HuggingFace Live Demo](#)

- Designed and built complete full-stack platform connecting Pakistani talent with global clients
- Implemented user authentication system, project management features, and secure backend architecture
- Currently deployed and live for real user interactions on Hugging Face

Scrollix: Manhwa Catalog Platform | HTML5, CSS3, PHP, MySQL

- Designed a high-fidelity, responsive catalog interface inspired by modern streaming platforms, utilizing a minimalist layout and interactive hover effects.
- Developed a "mobile-first" user experience, ensuring the catalog and navigation remain seamless across various screen sizes.
- Integrated a PHP/MySQL backend specifically for User Authentication, implementing secure registration and login workflows to manage user access.

Scriptclean A11y Guard | Python, Flask, Machine Learning

IBM Developer Day Hackathon Participant

- Developed intelligent web accessibility auditing tool addressing WCAG 2.1 compliance gaps
- Implemented automated accessibility scanning with real-time code suggestions using AI/ML
- Engineered end-to-end solution: Python/Flask backend, interactive frontend interface, deployment pipeline.

Travelle: UI/UX Discovery Prototype | Canva, Double Diamond Framework

- Designed a high-fidelity discovery prototype for a travel platform, focusing on user-centric navigation and clean information architecture.

- Applied the Double Diamond design methodology to identify user pain points and create a streamlined "Explore" page layout.
- Focused on visual hierarchy and minimalist design principles to reduce user friction during the travel planning process.

EDUCATION

Bachelor of Science in Computer Science

Government College Women University Faisalabad, Pakistan | Expected Graduation: 2027

- Active participation in technical projects and hackathon competitions
- Continuous learning through professional certifications and online courses
- Hands-on experience with full-stack development in real-world scenarios

CERTIFICATIONS

- **Front-End Developer Professional Specialization** – Meta | 2025
- **Prompt Engineering Specialization** – Vanderbilt University | 2025
- **Python for Everybody Specialization** – University of Michigan | 2025
